
Dinner Party: After reading the Dinner Party Information Sheet, write what you have learned about Helmeted Honeyeater diet and beaks.

Describe or draw the beak of the Helmeted Honeyeater:

What does the Helmeted Honeyeater eat?

How does the Helmeted Honeyeater's beak help it to eat its food?

Do you think that Helmeted Honeyeaters could change their diet to eat something else like seeds? Why/why not?

How do you think that the environment that Helmeted Honeyeaters live in affects them?

This project is supported by the Port Phillip and Western Port CMA, through funding from the Australian Government's National Landcare Program.
